About me

Tech Lead and Full-Stack Engineer with 7+ years in React and TypeScript across web, iOS and Android. Leads frontend architecture and migrations across teams: sets the technical direction, builds the shared platform and design system, and brings the developers along. Most recently led a platform transformation at Evinova (AstraZeneca). Star helper in the world's largest React chat community.

Experience

Anton Wester AB - Independent Software Consultant **Gothenburg**

Full-Stack Engineer, Med Tech Platform @Evinova (AstraZeneca) *10/2024 - Present*

- Led the transformation of a regulated med tech product for web, iOS and Android: re-architected web, mobile and server, and migrated step by step from legacy systems into one shared TypeScript monorepo (React, Next.js, React Native/Expo, Node.js, Nx/Turborepo).
- Set the technical direction for several teams and guided them onto shared ways of working.
- Built the shared design system and component library with Storybook.
- Set up the test automation foundation (team velocity +20%), cut CI times by 60% and mobile bundle size by 20%.

Full-Stack Developer, AI Products for Lawyers *03/2026 - Present*

- Designed and built LLM features for daily legal workflows such as document translation, legal text summaries and chat-based course evaluation. Cut manual review time per document by 80%.

We App **Gothenburg**

Tech Lead - Cross Platform *10/2022 - 10/2024*

- Led the cross-platform group and set the architecture and technical direction for its projects.
- Architected and led the development of an all-in-one planning and productivity universal application for web and mobile, replacing and expanding an existing Android application.
- Built an Expo template that standardized new projects, saving about 200 hours each. Still in use.
- Built a smart digital home insurance app, from client and server architecture to self-hosted monitoring and A/B testing.

Software Engineer *05/2021 - 10/2022*

- Delivered React and React Native projects, from responsive websites to mobile apps with chat and courses.

Telia **Gothenburg**

Software Developer *08/2019 - 05/2021*

- Cleared a 200-issue bug queue alongside sprint work, and took part in migrating the web client from Angular to Vue.

Projects

SökHem - AI-native real estate platform - sokhem.se 04/2026 - Present

- Founded and solo-built a buyer-driven property matching platform: a monorepo with SSR web (React 19, TanStack Start), API (Hono, oRPC, Better Auth) and background workers (BullMQ).
- Postgres/PostGIS, Redis and Stripe; self-hosted with Docker, Traefik and Dokploy, monitored with Grafana.

OpenAudit - Open source audit tool - openaudit.se 10/2026

- MIT-licensed tool that audits code, sites, apps, containers and cloud in one scored report, from the terminal, CI or an AI agent over MCP. 37 built-in auditors and 52 wrapped open-source scanners.

Lingo - lingo.antonwester.se 03/2026

- AI-powered full-stack platform that automates internationalization and translation management for software projects.

Technical Skills

Leadership: Technical direction across teams, frontend architecture, legacy migration and consolidation, design systems, shared ways of working.
Languages: TypeScript, JavaScript, Java, Kotlin, Swift, Dart, C, SQL, CSS, HTML, GraphQL.
Technologies/Frameworks: React, Next.js, React Native, Expo, TanStack, Astro, Node.js, Bun, Hono, Vue, Angular, PostgreSQL, Redis.
AI: LLM integration (Claude, OpenAI), agent and tool orchestration, prompt evaluation, AI-assisted engineering.
Developer Tools: Nx, Turborepo, Storybook, Playwright, Git, GitHub, Docker, Kubernetes, Azure, Cloudflare, Supabase.

Education

Chalmers University of Technology **Gothenburg**

Bachelor of Science in Computer Science and Engineering *08/2016 - 06/2019*
